# Our faith

Choose to fly impression template

ADD THE TITLE

We believe that there is good in all of us, and that if we do good, good will be returned to us, creating domino effect in our communities and reaching unimaginable levels. We believe that our utility projects provide good space for this area and allow new communities that do not use cryptocurrencies as a source of transactions to finally do so in this new monetary era..

## Our faith

You, the people, have the power to make life free and beautiful, to make life a wonderful adventure. And then, in the name of democracy, let us use that power. Bring Us Together. Let us fight for a new world, a decent world with a chance to work, a future for youth and a safe future for old age”

We believe that the idea of cryptocurrencies should be freely available in the dissemination of knowledge about a relatively new decentralized and efficient means of exchange. As a group, as a member of society, we support the concept of unity and cooperation, and believe that great things can be achieved when we work together with purpose and in a hurry.

# Our philosophy

Choose to fly impression template

SHIBACASH's flag ship utility use case, called audit, is based entirely on the concept of penetrating the world with goodwill by reducing deception in the field of encryption, and constantly exploring the potential for innovative concepts to be executed in the most complex way possible, for Mass adoption in society.

## About us

in the encryption asset fraud on the high side today, our founder very hated these cheaters project, these cheaters a day operating numerous encryption asset fraud, they will carry out packaging marketing, fake pre-sale site, even setting up countless functions in smart contracts to cheat investors is a terrible and dishonest act.

So in August, the founders came up with the idea to help countless investors stay away from these scams, so they brought in close friends, technicians, hairdressers, and dealers to attend the conference, where their minds converged, had A lot of good ideas, they made a terrible decision, that is to help more encryption assets friends away from the scam, while upgrading Shib to 2.0Shibcash, encryption assets have protection scam token, Shibcash will be encryption assets industry innovation,

it's a detector and evaluation encryption APP that you can call a fraudster's killer. It will clean the air and help more people stay away from scams. This killer will kill fake encryption tokens, reveal the secret of the fraud token, it will reveal the information and ideas of the fraud token, easy to understand it, encryption investors only need to pay SHIBCASH can be away from the scam, and it will let millions of people achieve wealth dream. And so this great dream was born.

# About us

Choose to fly impression template

Shib CASH total supply of 1000 trillion, Chinese name shih-chien CASH, English name Shib CASH is de-centralized spontaneous community building experiment, the sponsors initially set up, the encryption assets of a leading group of prominent investors, the team assigns appropriate roles based on skills and agrees on the future, and anyone has time to develop and move forward. It's called Chai Quan cash, and it wants everyone to have it, because in the future it's going to be very valuable, because this group created, based on the Shib model, an extremely deflationary encryption token that Burns 20 percent of its trade, this is our tribute to Shib, because the future it has infinite possibilities, this is the hope like Shib and Satoshi Nakamoto to maintain the youth of the blockchain spirit, this is a start from scratch experiment, everyone fair, equal to achieve zero experiments.

## Mission and vision

Choose to fly impression template

---

# Mission and vision

SHIBACASH's mission is to change the field to make it more secure for the global encryption community, especially with the release of a new generation of Tokens, most of which are subject to circular encryption scams. The all clear vision is that in the future, all legitimate cryptocurrency launches will be verified, and the community trusts the verification of world famous codes. Obviously, this is not a 100% foolproof approach, as it does not exist in this area, but the aim is to minimize risk. As countless investors and crypto-token developers join in, we'll have very few tokens because they'll love it

# Economic Model

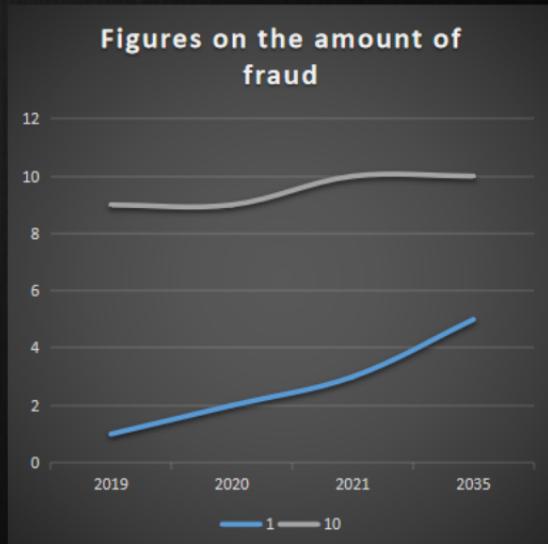

02

# Encryption for fraud

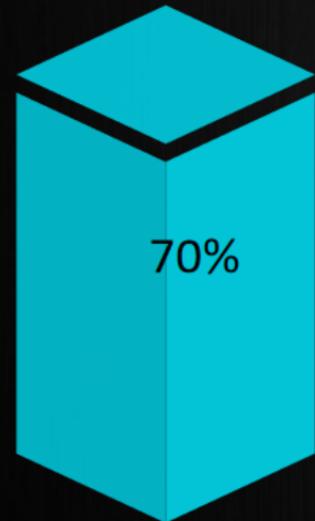

The cryptocurrency market is growing by 30 per cent a year, and fraud is expected to rise relative to the growing cryptocurrency market

In 2019, a total of \$4 billion was stolen from millions of investors around the world, a number that is expected to grow by 30% if security measures are not tightened, and fraud to a staggering \$19.3 billion by 2025.

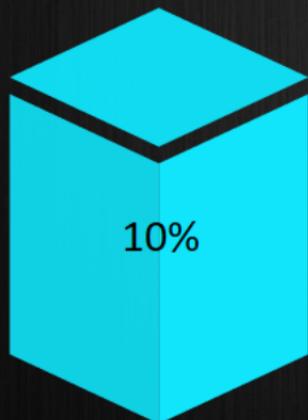

With 80% of ICOS (first token issues) fraudulent, demand for higher security from encryption investors around the world is growing rapidly, and encryption currency security has not made much progress over the past decade, resulting in billions of dollars in losses. As the encryption industry inevitably grows in the near future, Dogezilla Vault will fill it

1.Audit Platforms, developers looking for community confidence, community investors looking for safe projects. .

2. The learning platform, the vault in the space is designed to provide a degree of protection and to reduce the penetration of scams and conspiracies.

3.Community-driven projects-the flexibility of community projects is that we can evolve as needed and expand beyond safety.

Intelligent contract  
automatic design  
platform

DAPP security  
guard

Decentralized  
security bounty  
platform

Digital  
transaction asset  
security system

Security  
Intelligence

Safety Awareness,  
risk management,

When investors and project owners participate in contract audits, they need to buy SHIBCASH token payments and get the results of decentralized token audits, which is fraud prevention, because Shibcash's database is for the vault, which will aggregate the world's most famous tokens, carry on the comparison and the analysis realizes the value report, brings the hope and the growth to our investor. When we SHIBACASH token recognition as an audit, it will be very little, which is its future value

Shibacash is a contract automated audit system, digital asset trading security system, DAPP security guard, blockchain security intelligence, decentralized security bounty platform, security risk detection system

## Mission and objectives

# Will we be the next Shiba?

At SHIBACASH, our long-term goal is to improve security in the encryption market. We believe that our project has changed the rules of the game and really made encryption better. Our subversive approach and complex way of doing things will ensure that we open up and fill an apparently much-needed gap in this area.

SHIBACASH's mission is to change the field to make it more secure for the global encryption community, especially with the release of a new generation of Tokens, most of which are subject to circular encryption scams. The all clear vision is that in the future, all legitimate cryptocurrency launches will be verified, and the community trusts the verification of world famous codes. Obviously, this is not a 100% foolproof approach, as it does not exist in this area, but the aim is to minimize risk. As countless investors and crypto-token developers join in, we'll have very few tokens because they'll love it

# Development Planning

## Development Planning

We have a dream, so that people around the world have our token, eventually become the end of the game token, change the existing phenomenon of encryption assets, encryption investors access knowledge and wealth

## Project team

### Two acquaintances and a close group of family and friends

The private community, founded by the two founders, quickly grew into a community of close family and friends that became SHIBACASH. Our community has grown organically from the roots. We continue to promote the power behind organic growth to our members and continue to emphasize the importance of word-of-mouth relationships for longevity. Our + 2 tradition is a task, and each member's responsibility is to increase their family and friends as a valued member of the community. This strategy has grown our community into an infinite society
